

Polestar

Six good reasons to add the Polestar 2 to your fleet

01.

Smaller carbon footprint

Goodbye fuel stations and annual fuel budgets. Hello smaller carbon footprint and green credentials. Making the shift to a fully electric fleet helps to match corporate objectives on emissions and leads to better business. You'll be surprised how many customers notice.
02.

Improve your bottom line

The UK government offers grants and tax incentives to change to fully electric cars. The ongoing cost of ownership is also an important consideration. As well as saving thousands of pounds each year in fuel costs, your company will benefit from lower maintenance costs, and possibly also from local incentives that make electric driving even more attractive.
03.

Reach your customers

The Polestar 2 is a fully electric five-door fastback with a range of up to 470km/292miles (WLTP). As the first car in the world to integrate Google's Android Automotive OS, it provides access to Google Maps which can optimise routes, and highlight relevant charging locations.
04.

Minimal downtime

The electric drivetrain of the Polestar 2 has far fewer moving parts than you find in a conventional car. This means that the service intervals are further apart and that the operating costs are considerably lower. To reduce downtime even more, service points can offer convenient Pick-up and delivery, as well as replacement cars.
05.

At the forefront of safety

The Polestar 2 doesn't just protect you, it also helps to prevent accidents from happening. As we share engineering expertise with Volvo, the car is equipped with the latest safety technology, including the most advanced driver assistance systems. Wherever your travels take you, you have an ever-present co-pilot to back you up.
06.

Hands-free working with Google

Relax, keep your hands on the steering wheel and use your voice to plan a meeting or write a reminder. The Polestar 2 is the first car to use Google's Android Automotive operating system, offering the natural voice recognition of Google Assistant and seamless integration with Workspace, Google's cloud-native suite of business apps.
