

Polestar 4

Model Year 2027 (MY27)

Polestar 4 The coupé

Polestar cars represents a new form of electric performance. One defined by minimalistic design, technological innovations, sustainable solutions, and a complete lack of compromise. Polestar 4 continues that philosophy together with the rest of the Polestar collection. Available online and in 27 markets worldwide.

It all started with Polestar 1; a limited-production electric performance hybrid built from 2019 to 2022. Then came Polestar 2, an electric fastback, followed by Polestar 3, electric SUV. Polestar 4 combines the aerodynamics of a coupé, with spaciousness of an SUV. And like all Polestar EVs; technology for the electric age.

This is Polestar 4.

Performance

Polestar 4 comes with sportscar levels of performance, with the dual motor variant accelerating from 0 to 100 km/h in 3.8 seconds. The driving dynamics remain true to the Polestar philosophy, with direct steering and sharp handling that inspires driver confidence.

The Dual motor variant delivers 400 kW (544 hp), 686 Nm of torque and a range target of up to 590 km WLTP. The rear-wheel driven Rear motor with 200 kW (282 hp) and 343 Nm has a range target of up to 620 km WLTP on a single charge.

Technology

Polestar 4 elevates the electric driving experience with a rear-facing HD camera for a wider field of vision, a 15.4" centre-stack display in landscape orientation, and the solar system-inspired ambient light line that orbits around the interior to illuminate the thoughtfully matched color and material combinations. With Google built-in, Polestar 4 instantly becomes part of the driver's digital ecosystem.

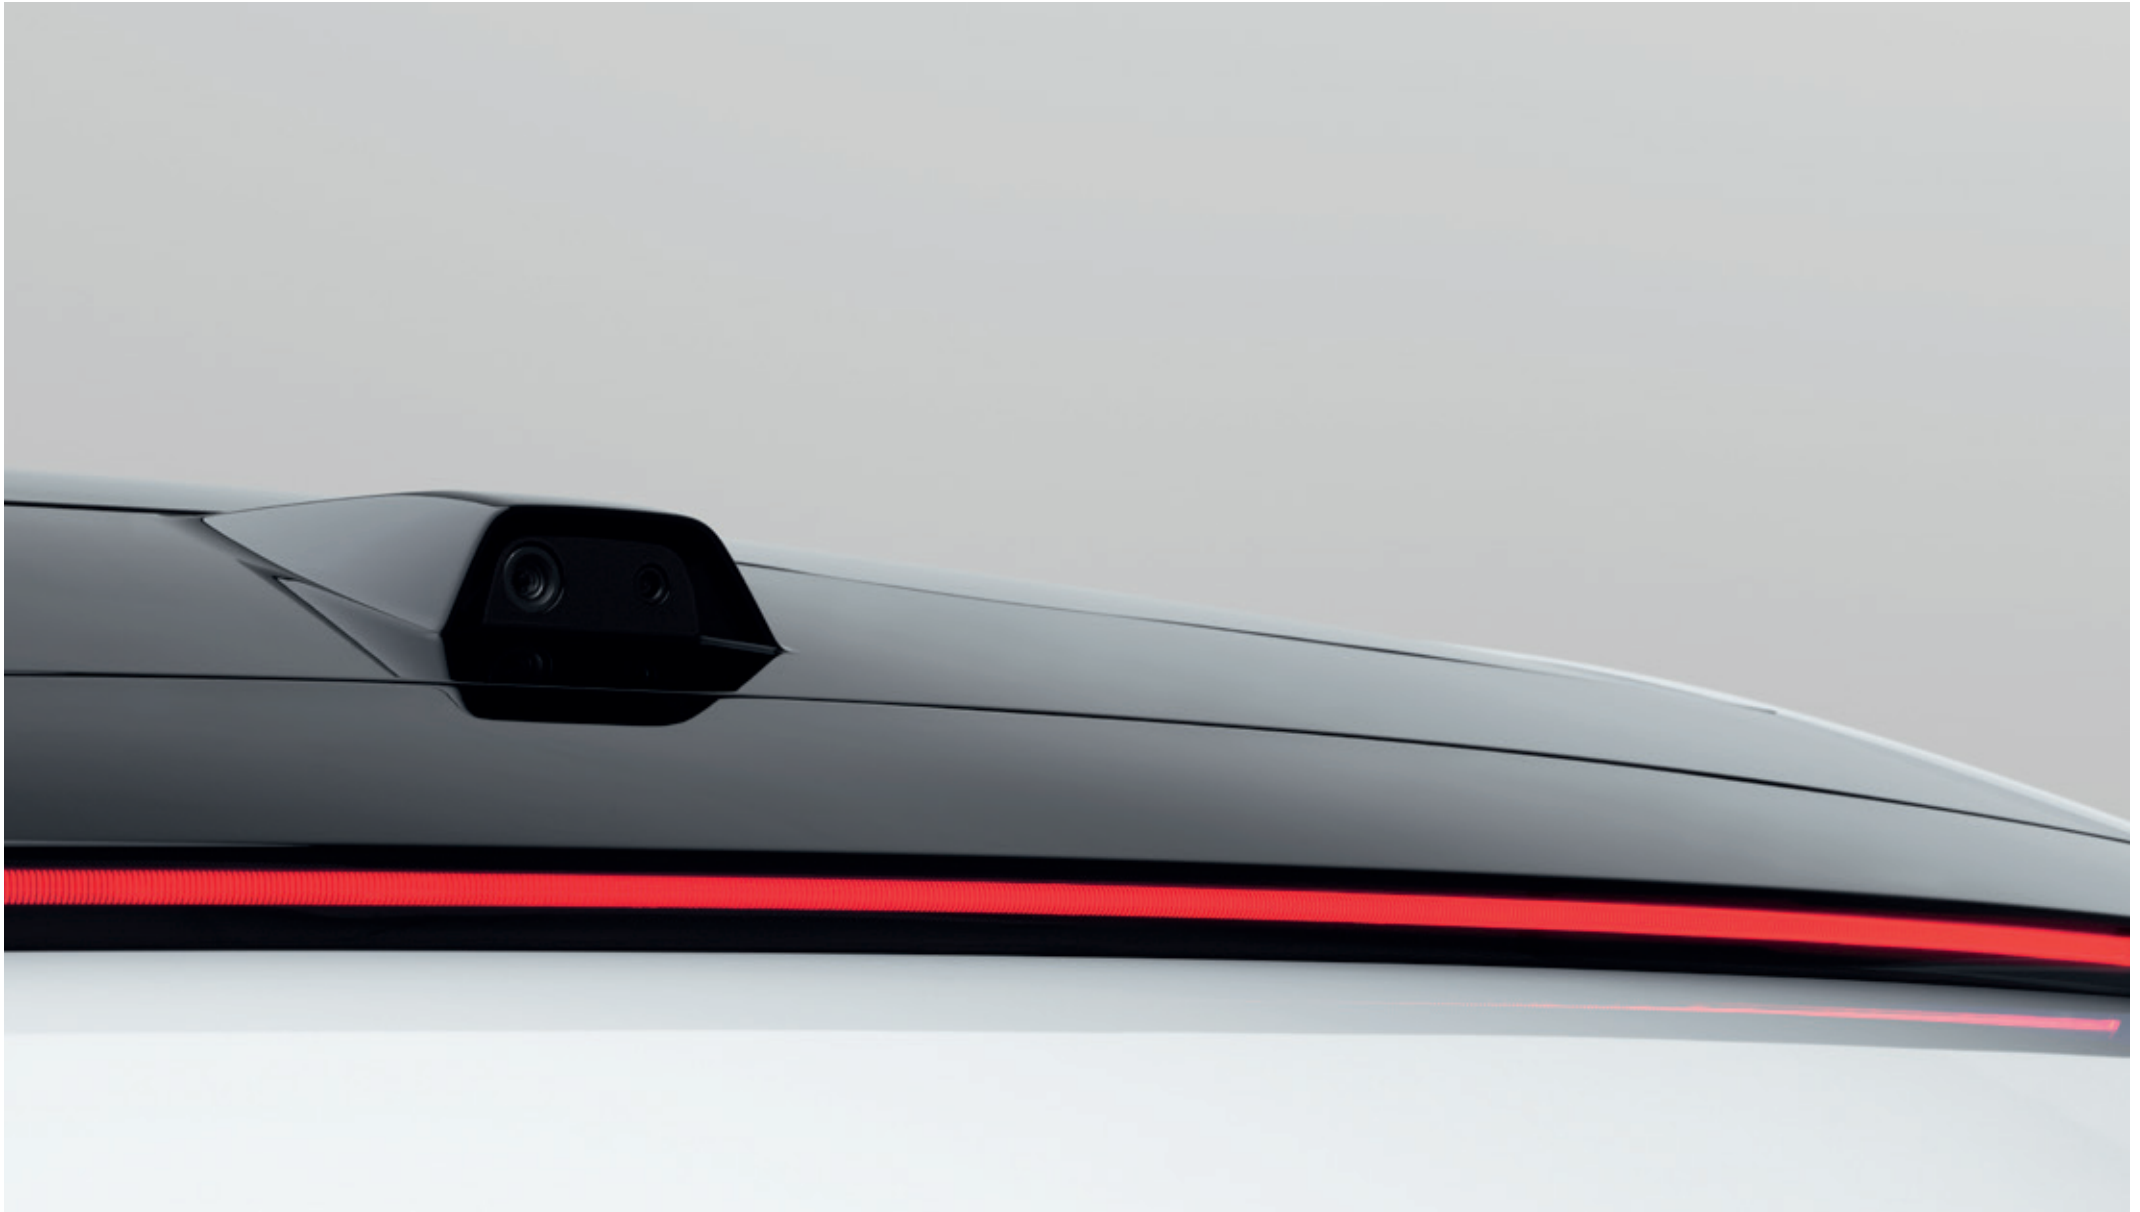

15.4" Landscape screen
Featuring standard Google Assistant, Google Maps, and Google Home integration.

Solar system-inspired interior illumination
The ambient light line orbits around all occupants and can be customised with different planetary themes to suit light conditions and mood.

Rear-facing HD camera

This is the rear window. The high-definition camera looks past all intrusions to make rearward vision clearer, wider, and safer.

Outer design

The Polestar design language continues with a sleek, aerodynamic coupé profile, ideally suited to the electric powertrain. The low, sporty front, the rear aero blades, and a completely flat floor work together to optimise range and efficiency. Frameless mirrors and flush door handles are also designed to improve air flow.

Headlights

The daylight running lights wear the Polestar signature dual blade design. Underneath the lower blade is a 32 pixel headlamp, blending minimalist aesthetics with intelligent adaptive technology in all light conditions.

Aerodynamics

The sleek, aerodynamic coupé profile is the perfect form for the electric era, combining a spacious interior with a sporty silhouette.

Rear light bar

The rear light bar adapts to the surrounding light conditions by constantly adjusting its illumination.

Inner space

The EV for passengers and drivers. The stretched panoramic roof creates a light and airy interior experienced from the comfort of every seat. The absence of a rear window creates a modern and spacious environment with plenty of headroom for those in the rear. As night falls the ambient lighting again floods the cabin with shades inspired by the solar system. The seats are electrically adjustable in the front and electrically reclinable in the rear.

Sound system

Harman Kardon Premium Sound elevates the audio experience in the Polestar 4. With 16 interior speakers and producing 1400W via a channel-hybrid amplifier, the system delivers unparalleled clarity, pitch and power. Immerse yourself in a world of precision-tuned sound that enhances every moment of your journey.

Panoramic roof
Arching above all passengers from front to rear, the generous panoramic glass roof floods the interior with light.

Camera rear window
This not only provides a better rearward view, but also a spacious rear seating area with plenty of headroom.

Includes

- Pilot assist
- Lane change assist
- Park assist pilot

Pilot pack

Includes

- Heated steering wheel
- Power operated steering column
- Easy ingress/egress
- 12-way electrical seats with mechanical cushion extension

(Only available in Europe and Australia, included in Plus pack for rest of markets.)

Comfort pack

Includes

- Graphical Head-up display
- Harman Kardon premium sound
- Pixel LED headlights with adaptive high beam
- 3-zone climate with AQM PM 2.5 sensor
- Interior illumination Star knit deco & high-level illumination
- Illuminated Polestar logo in front
- Power operated tailgate with handsfree opening & soft close
- Net pocket in rear luggage compartment
- Rear control and entertainment screen
- Electric reclinable rear seat backs
- Heated rear seats

(Requires Comfort pack)

Plus pack

Includes:

- 22" Performance
- Performance optimised tyres
- Brembo brake callipers in Swedish gold
- Performance Engineered performance discs
- Polestar Engineered chassis tuning
- Swedish gold seatbelts
- Swedish gold valve caps

(Requires Dual motor and Plus pack)

Performance pack

Includes:

- Bridge of Weir leather in Zinc
- Bridge of Weir leather in Charcoal
- Ventilated front seats with massage
- Harman Kardon headrest speakers in front seats
- Rear comfort headrests
- Brushed textile headlining
- Charcoal deco

(Requires Plus pack)

Nappa upgrade

Includes:

- Colour upgrade
- Premium colour upgrade
- Body-coloured lower claddings
- Electrochromic glass roof (requires Plus pack)
- Privacy glass on rear windows
- Power foldable towbar
- 21" Sport wheels (incompatible with Performance pack)
- Tailored knit in Mist with Zinc deco (requires Plus pack)
- Charging cable for home/public wallbox

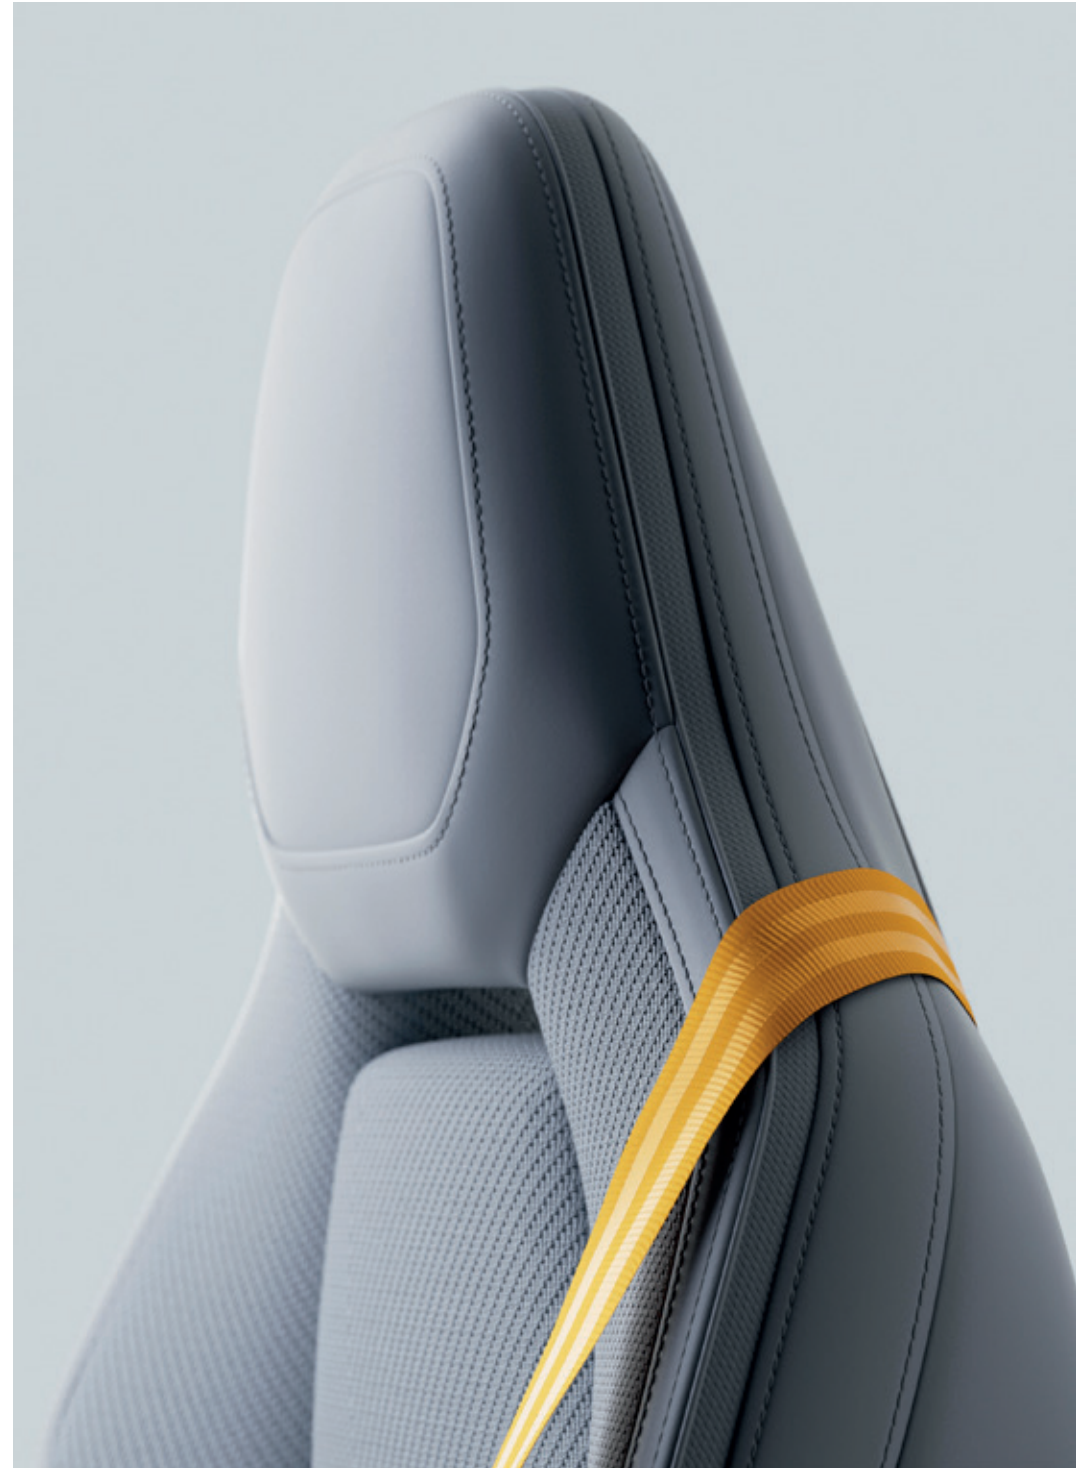

Single options

Safety

Polestar 4 has a 5-star Euro NCAP rating and achieved the highest ever score in child occupant safety, due to its advanced structural design and electronic systems. Safety has been part of the Polestar DNA since the beginning, and these protective genes are evident in the Polestar 4. Cutting-edge driver assistance and impact protection systems safeguard all occupants at all times.

Fleet and Business

Make the zero-compromise choice for your fleet or company car with Polestar. Financial benefits, servicing and assistance, and advanced driver tech make for a fully hassle-free experience.

A sustainable choice for drivers and fleets

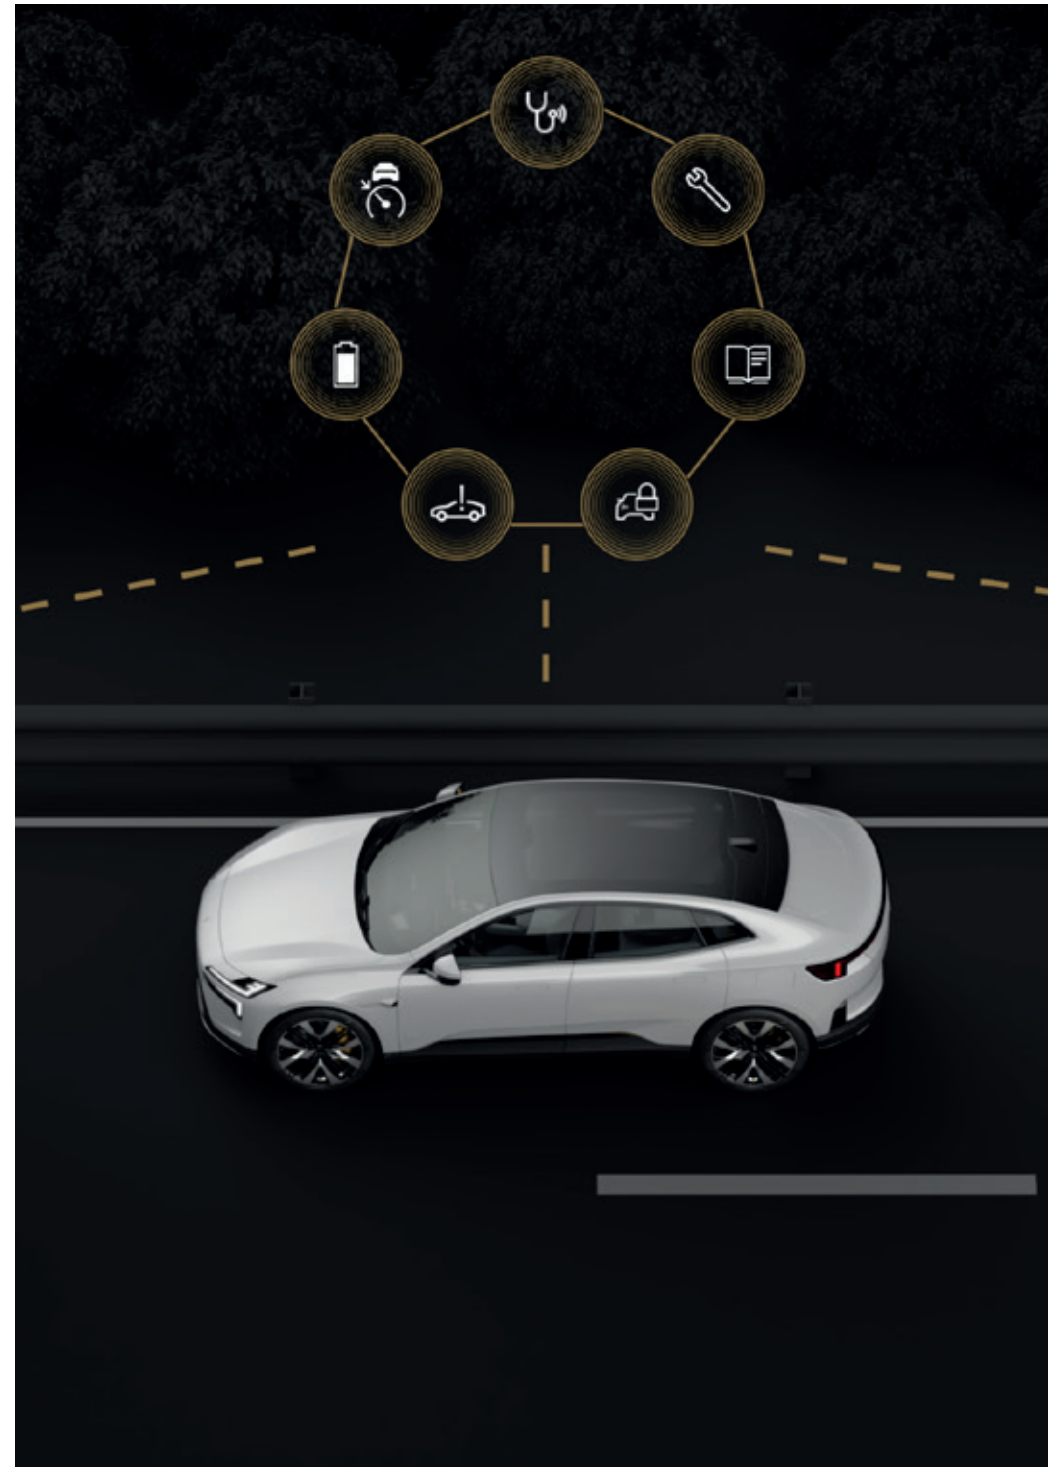

Making the switch to an electric vehicle or fleet can help your company achieve key sustainability objectives, while various financial incentives make going electric still more beneficial. Maintenance spending is also vastly reduced. And, by charging with renewable energy, you can make your Polestar closer to zero-impact in-use..

Advanced technology on the road

Driver safety technology including preventative collision warnings and advanced Blind Spot technology offers a complete picture of the road around you.

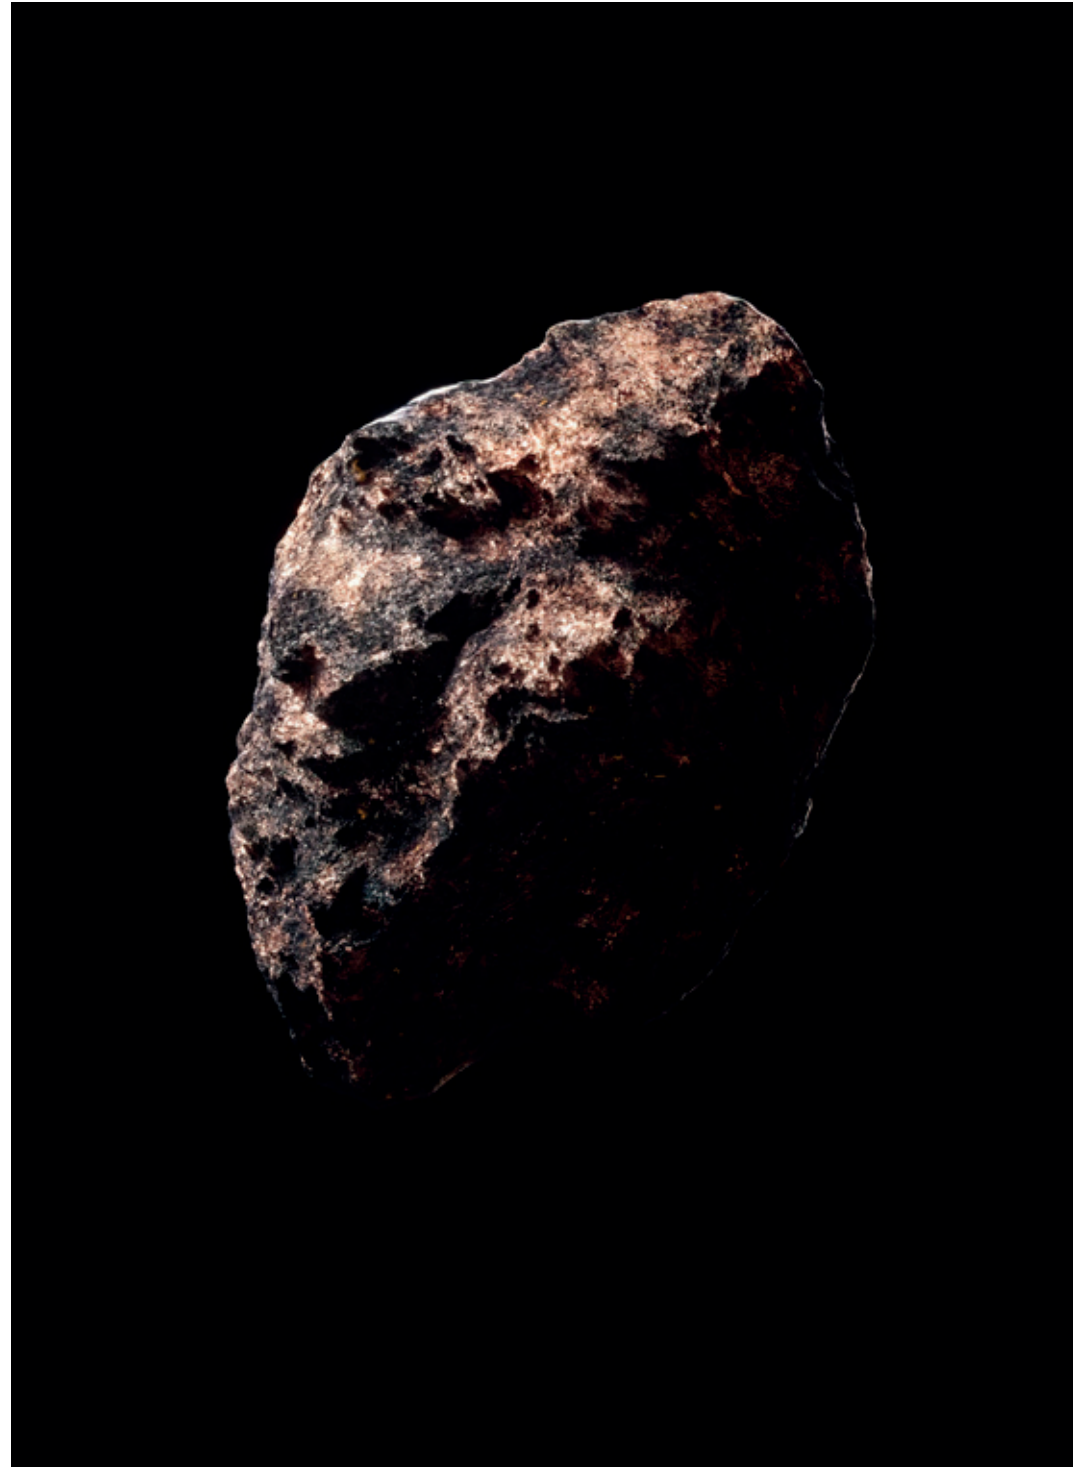

Polestar Fleet Telematics

Polestar Fleet Telematics is a connected service that enables fleet operators to manage, monitor, and optimize electric vehicle fleets using real-time vehicle data, usage analytics, and actionable insights. The platform integrates seamlessly with leading fleet management systems without requiring additional hardware, helping operators improve efficiency, reduce operational costs, and make smarter data-driven decisions across global fleets.

Next-level sustainability

Leaving a smaller climate footprint is a core Polestar principle. Polestar 4 is another step forward in our journey to use more responsibly sourced materials and solutions, reduce greenhouse gas emissions, increase transparency and promote circularity.
